1. On 8 November 1950 a biplane was parked in front of a hangar of the Rangsdorf (N 53/Z 82) **Bueckerwerke** (Buecker Plant). Two fighters without engines were seen in a hangar, which was partially open. There was no flying at the airfield between noon and 4 p.m. although the weather was good. Two standpipes or pumps, as in filling stations, were at the railroad line, in the northeastern section of the field and were guarded by sentries. The field was surrounded by a high board fence. If there were also containers they were underground. A railroad employee said that railroad cars, loaded with large boxes, arrived at the field at irregular intervals. *

- 25X1C * **Comment.** The airfield is not occupied by an air unit. The present and previous reports indicate that a Soviet Air Force repair shop is stationed at the field. It is not known for which units repairs are performed in the repair shop.
